EDLounge Ltd covering business's EDClass, EDArcade, EDEXams and EDQuals

EDLounge is an online e-learning resource that requires the procurement of student and teacher data to help create user accounts effectively and efficiently.

DATA Protection Agreement

Ensures:

EDLounge Ltd complies with GDPR May 25th 2018
Protects rights of Staff, Customers and our partners in business
Transparent in the handling of data
Ensure good practice regards data handling

RISK:

Responsibilities of Data within Edlounge Ltd is the responsibility of all staff, knowing and understanding data policy. Main responsibility will be with the board of directors, and the data protection officer will continually inform the board of directors of any risk and will be responsible for continual risk assessment. With the office of Edlounge Ltd, or any 3rd party businesses premises.

Product Development Manager will be responsible for all future system upgrades, and safe integration of any data transfer.

All current EDLounge Ltd employees hold GDPR level 2 certificates, future employees undergo basic GDPR awareness courses during induction and will be expected to undergo Level 2 training by the end of any probationary period.

DATA REQUIRED & PURPOSE:

The data required is to create user accounts in the EDLounge system, the users have chance to create and or update information including usernames and passwords.

The student data can only be viewed and edited by authorised users who are given this level of access permissions, by the consent of the establishment, i.e. teaching staff. Teaching staff however, can only be defined to particular

Aston House | Campbell Way | Dinnington | Sheffield | S25 3QD
Tel: 01909 568 338 | Fax: 01909 568 350 | Email: mail@edlounge.com

individuals and/or groups, if desired. All user events are comprehensively logged, allowing an audit trail of what events have been completed and by which user.

The data currently requested is a student profile to enhance the correct level of teaching for that student. Required details include Forename, Middle Name, Surname, Date of Birth, Year group, this is requested at start up via WONDE. It is planned in the future to request further information, which will require further permission sets agreed with the SLT, Data Manager and IT department in Schools, these will consist of Ethnicity, Language, Special Educational Needs, predicted subject levels/grades, achieved subject levels/grades.

Student Profiles are manually added by school and are not mandatory fields when adding to offsite seats only: Both EDLounge Ltd and Academic establishments aim to work for best results and student profiling is key. Additional information requested is only for the purpose of essential data for students on offsite "seats." This includes academic levels, SEN needs, SEMH, attendance, behaviour.

Additional Safeguarding information will be requested to protect staff from the allocating school, staff from EDLounge Ltd as well as increasing the protection of the student concerned. This data is to be collated under legitimate intentions and communication will be via a recorded phone call or via institute emails only.

Data captured will be retained in a fully secure environment, with privileged access.

All identifiable data will be soft deleted when no longer required or requested by the school in writing. "No longer" required will be September 1st following leaving year 6, year 11 or Year 13 dependent on type of academic establishment. Schools will be responsible to back up all their data prior to deletion and will be responsible for the data based on their own GDPR policy.

The benefits of data being used by the EDLounge system:

- To identify users
- To help mass upload the data to create accurate and correct user accounts
- To help track and monitor attendance, performance and attainment of all users
- The data would help with the filtering of user cohorts
- To save time for the end user to input individual accounts
- Only staff users can be added manually, students are added via WONDE encryption services
- Accounts can be manually configured anonymously
- All electronic data will require a password to access, when stored on local PC's, they will be password protected for access, as well as the corresponding data having additional password protection.
- No encrypted data to be transferred at the same time with access passwords.
- Continuous working partnership with schools aiming for the best outcomes of their students.

Edlounge Ltd aim not to print out any sensitive data, in the event of this happening all paper will be stored safely until shredded or passed to the person who the data refers to.

EDLounge Data Protection Policy for MIS Integration

For EDLounge to work effectively the system requires student and teacher information from the MIS to allow the resource to help track each student's performance, activity and progress.

The data given by schools is fully under their control, and we abide by very stringent policies and procedures in storing and processing any data received. This document highlights and details what data is captured, along with the reasoning for such a capture. This policy specifically targets the account creation on the EDLounge system for both students and teachers who will use the resource.

We capture and store the following student data also highlighting why the system requires this particular piece of data:

Aston House | Campbell Way | Dinnington | Sheffield | S25 3QD
Tel: 01909 568 338 | Fax: 01909 568 350 | Email: mail@edlounge.com

- **Preferred Forename** - Identifying reasons
- **Middle Name(s)** - Identifying reasons *Names help to create a default username to access the system*
- **Preferred Surname** – Identifying reasons
- **Gender** – To help with filtering and monitoring of performance and progression i.e. filter all Year 9 girls in Maths
- **Date of Birth** – To help with identifying those students with the same name and to create a default password to access the system dd/mm/yyyy

The teacher data captured by EDLounge is:

- **Title** – Addressing communications correctly
- **Preferred Forename**
- **Middle Name(s)** *Names are used to identify user and help to create username*
- **Preferred Surname**
- **Initials** - This 2-3 digit code is used as a default value for password generation
- **Class** – To show and permit teachers to view their own groups, and highlight to SLT who supervises this group. This helps with reports and assessment.
- **Subject** – Indicates what subject the above class is studying

The student and teacher data is collected via an export from your designated MIS programme using WONDE (Data Protection Policy, supplied separately) all data is up-to-date according to the MIS data gathered and stored from the school.

Students and teachers are assigned usernames and passwords that protect access to the EDLounge system and ensure that students only access the relevant area, and that teachers can only access the student data relevant to them and their school.

All data is stored and backed up using a secure server, which features SALT encryption technologies and firewalls to protect the information being accessible by any other party. The EDLounge team are all certified and trained to the latest policies for data protection; certificates can be viewed upon request.

The data will be placed into the EDLounge RDBMS (Relational Database Management System) to create, locate and track user accounts, and nothing more.

The server and RDBMS are securely stored and hosted via a third party organisation (Rackspace), who are ISO 27001/2 recognised (<http://www.rackspace.co.uk/about-us/security>). The servers are firewall and password protected using a SALT encryption policy. Data is only accessible via a specific static IP address and authorised personnel with access rights to the database. Frequent backups are taken of the data stored on an encrypted server.

Future Security enhancement: From May 25th 2018 EDLounge Ltd will move to an AWS platform. THE AWS platform means further advanced encryption, means all data is encrypted during transit and at rest. The system has managed threat detection and enhanced firewall protection.

Security Resources can be found at the following address <https://aws.amazon.com/security/security-resources/>

The data viewed by the EDLounge team is to locate a student/teacher username and password, should any information be forgotten and help to the user(s) is required. Again, all user events are comprehensively logged, allowing an audit trail of what events have been completed and by which user.

WONDE Data Protection Policies if not attached can be found at web addresses below

This document should help specifically:

<https://www.wonde.com/downloads/Wonde%20-%20Security%20Information.pdf>

Other documents available on www.wonde.com/documents. With these, you'll be able to find more details regarding where data is stored (AWS Ireland) and reassurance that data is encrypted end to end at both transit and at rest. There will be more information to come that will be released to schools in due course.

Student data will always be added to the system via an encrypted service through WONDE offering the highest protection.

Staff can be added via excel sent password protected via email. N.B this method will be changing By September 1st 2018 to WONDE only, so all data is sent via the highest encryption possible.

EDLounge Data Officers then make sure that information is destroyed under the EDLounge Ltd Data Protection Policy, breach of such policy leads to disciplinary procedures.

The alternative for the educational establishment is to enter data into the system themselves, and/or create anonymous accounts.

DATA Breach

EDLounge Ltd will immediately on recognition of a breach assess the level and consequence of the breach. Where a serious breach has occurred, the ICO will be immediately informed and the people affected will be informed. Where a data breach will not harm the end user a public notice will be released. The response for data breaches will be within 72 hours.

Sharing Safeguarding information

The sharing of safeguarding data supersedes GDPR If it's believed gaining consent regards the sharing of a child's personal data would put that child at risk; consent does not have to be gained. It is expected that professional agencies and organisations that the data will be shared with as a necessity for the protection and welfare of a child to have all safeguarding practices in place.

Right to be forgotten

People under the age of 16 will not have the right to be forgotten, but being an educational establishment where data may be needed in a legal defence, this data will be stored in a safe encrypted at rest area for 7 years. If known the student is a LAC (looked after child) this data will be kept for 75 years. All data is soft deleted on September 1st after leaving their educational establishment, and only selected individuals with enhanced security access will be able to recover data.

ICO registered

Registration Number ZA208722
Expires 29/09/18

Subject Access Request

At any point an individual or company have rights under section 7 of the DPA to request from EDLounge Ltd all information held on them as a company or individual. Edlounge Ltd will acknowledge this request within 5 days and supply the information within 28 days. Where data is supplied electronically there will be no additional cost, however if requested hard copy, this will be sent by special delivery and there will be a standard administration charge of £10

Aston House | Campbell Way | Dinnington | Sheffield | S25 3QD
Tel: 01909 568 338 | Fax: 01909 568 350 | Email: mail@edlounge.com

and a maximum of £50 dependent on the amount of data.

Data can only be requested in writing and can be supplied encrypted in .pdf format or sent as hard paper copy.

The data is not shared with any other party.

Up-to-date Data GDPR certificates for staff can be viewed on request.

All hardware and software security incidents incurred by users are those set out and adhered to by the establishment's policies.

Yours Sincerely

A handwritten signature in black ink, appearing to read 'SAM WARNES', with a stylized flourish at the end.

Sam Warnes

Managing Director and Creator of EDLounge Ltd
